Project Management
Fundamentals

I embarked on this course as I recently started a new job and lacked confidence. I wanted to acquire tangible project management tools and strategies to aid me as I move forward.

On IMNZ's Project Management Fundamentals course, not only did I learn some useful tools, but I also gained confidence in speaking and in my ability to succeed.

I really enjoyed making connections with the other learners and participating in the group activities.

I would certainly recommend IMNZ because the course was well-organised, educational, and had a well-balanced structure.
